

TYGERTM
Tree Rope

FABPROTM Polymers'
TYGERTM Tree Rope

FEATURES:

- Rope footage is guaranteed
- Superior tensile and knot strength
- Smooth, highly flexible rope that does not fray when cut
- Resistant to rot, moisture absorption, and most acids
- Available in different packs, strengths, colors and plies

FABPRO POLYMERS' TYGER-CUB, TREE-LOK, and PRO-LOK TREE ROPE are constructed of untwisted parallel filaments bound together with a spiral wrap, producing a single-ply tree rope that is smooth, highly flexible, very strong and does not fray when cut. The design allows our tree rope to flatten against branches, preventing damage to the bark and limbs. Compared with natural fiber tree rope, TYGER-CUB, TREE-LOK and PRO-LOK TREE ROPE are more economical on a cost-per-foot basis, will not rot or mildew, and are UV stabilized.

Available in Orange/Black and Solid Black.
